1 GETTING STARTED WITH APPLICATION

1.1 INTRODUCTION

The Supply Chain and WMS application helps user to manage their warehouse operations.

The application helps user to get material details on the basis of TO No. (Transfer Order Number) at the time of performing Put away, Internal Movement and Picking. User can also perform Stock Take as when required in order to compare/verify the stock stated in the system with the stock available in the inventory.

The document lays down the step by step process of application to provide clear understanding of the application to End Users.

1.2 PRE- REQUISITE FOR APPLICATION WORKING

1. Device Application

- a. MC3300 and MC9300 Calibration should have been completed.
- b. MC9300 will be used where items are there in chillers
- c. Application should be installed on Device.

2. Communication Server:

- a. Communication Server should be installed on server for Device and Database connection.

1.3 STARTING OR LOGGING ON THE APPLICATION

1. Device Application

- To start device application, install the application on the device and click on application icon on device's home screen.

2. Communication Server

- To start communication server application, install the application on server and click on application icon.
- Communication Server should also be running in backend while using the application.

2 APPLICATION OVERVIEW & WORKING

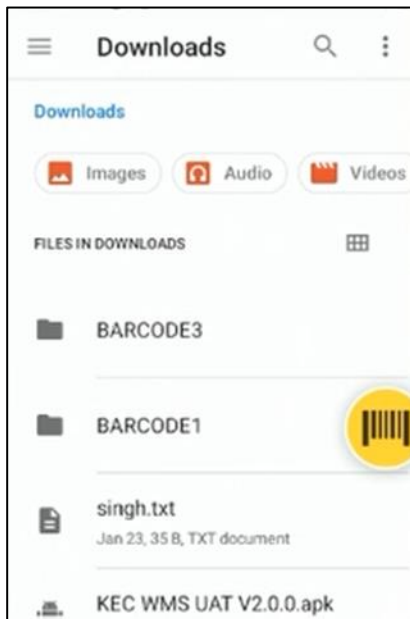

3 APPLICATION INSTALLATION PROCESS

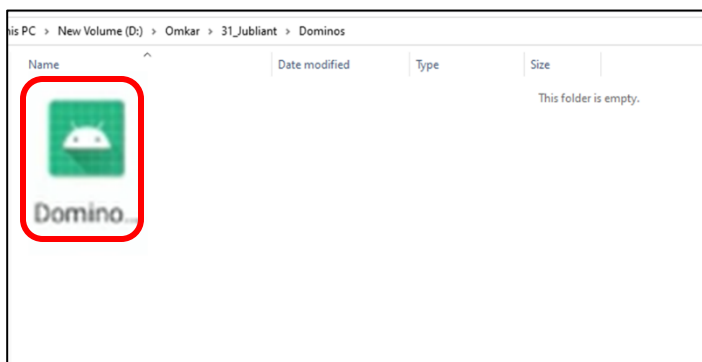

3.1 DOWNLOAD APK FILE AND INSTALLATION PROCESS

To use this application, you need to install the APK file on your device. Make sure the downloaded apk file is available on your device before using the application. Follow these steps to install the APK file:

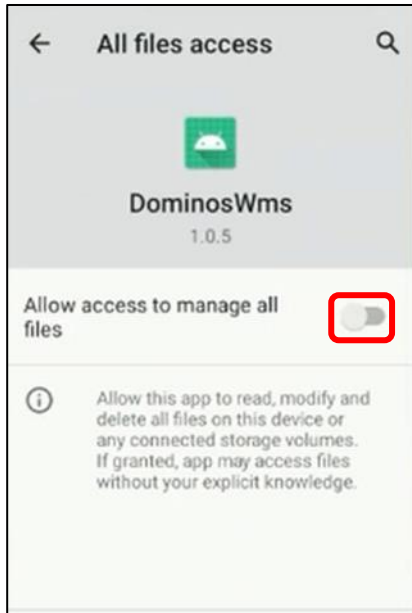

1. Download the apk file onto your device.

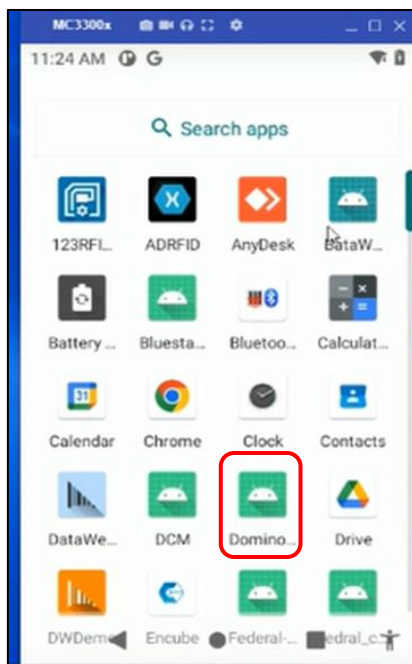

2. Create a new folder named "Dominos" and move the downloaded file into it.
3. Paste the file into the Domino folder.

4. Double-click on the apk file to launch the application.
5. Allow the application permission through settings.

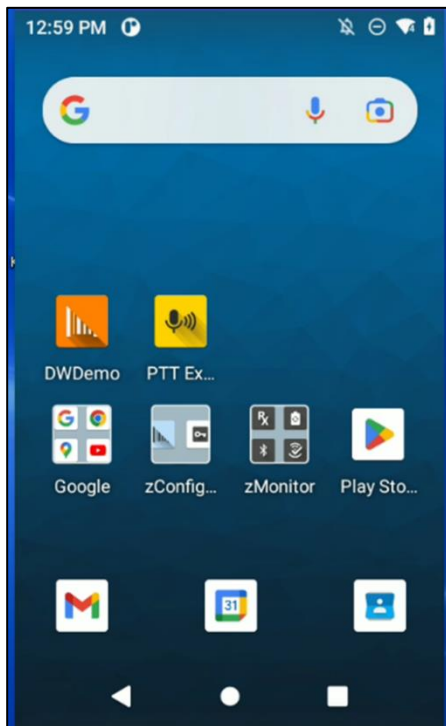

6. Install the application on your device.
7. Once the Installation is successful the app gets displayed in device.

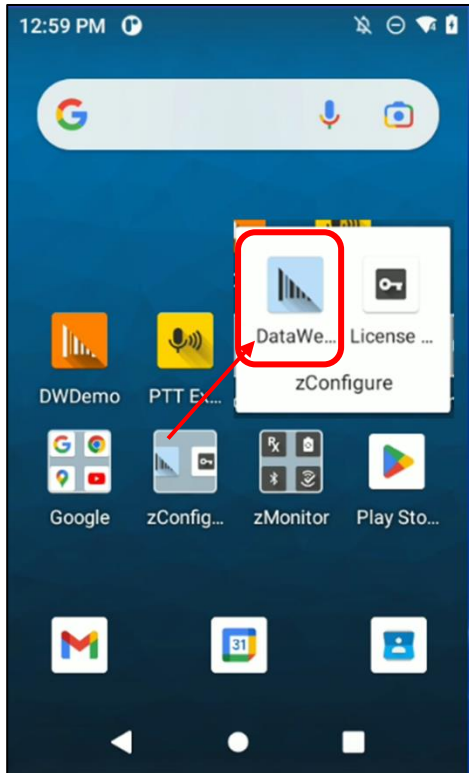

3.2 ADDITIONAL SETTINGS IN ZEBRA DEVICE

To enhance user-friendliness, certain device settings may need to be adjusted. To enable the Enter key in the device the following are the simplified steps to adjust device settings for enhanced user-friendliness:

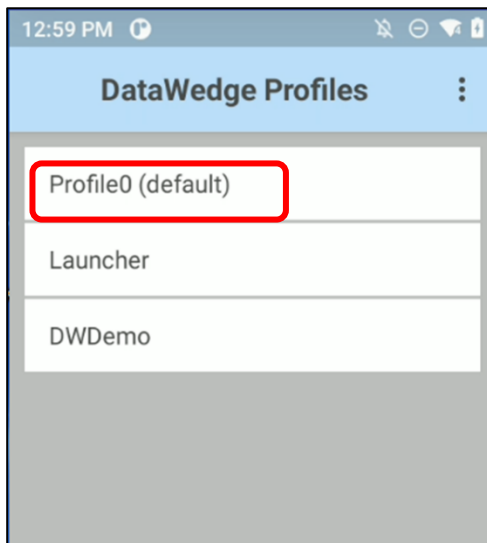

1. Open the **Home Screen** of your Device.

2. Tap on the **Z Configure menu** and select *Data Wedge Profile*.

3. Choose the default **Profile (0)** option.

4. Look under *Profile (0)* and select the *Basic Data Formatting* option.

4 APPLICATION MODULES

4.1 LOGIN- DEVICE APPLICATION

4.1.1 DEVICE- LOGIN

Click on the application's shortcut icon on device to run the application. A login screen will be displayed:

Username

Password

LOGIN

SERVER CONFIG

1.0.5

2023 Bar Code India Limited
All Rights Reserved.

If the application is running for the first time, then click on **Server Configuration** to configure the IP Address and Port Number.

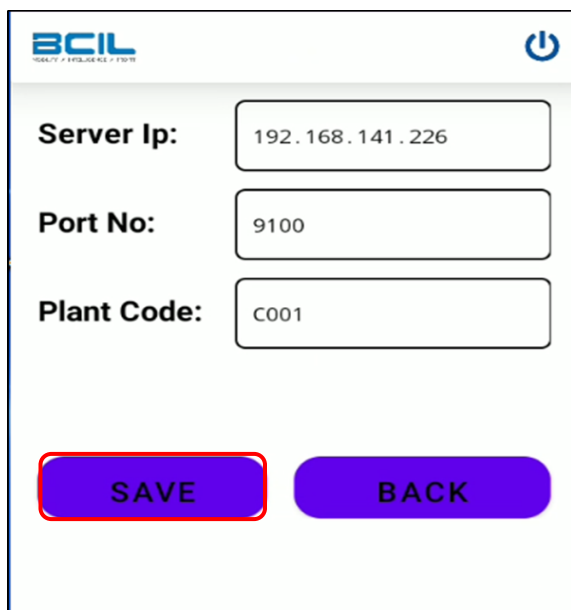

4.1.2 APPLICATION SERVER CONFIGURATION

The following screen is used to configure the Server IP Address, Port Number and Plant Code of the server where communication server is installed.

The screenshot shows the BCIL Application Server Configuration screen. At the top left is the BCIL logo with the tagline 'visibility intelligence value'. At the top right is a power icon. Below the header, there are three input fields: 'Server Ip:', 'Port No:', and 'Plant Code:'. Each field is currently empty. At the bottom, there are two blue buttons: 'SAVE' and 'BACK'.

1. Enter the Communication *Server IP* Address.
2. Enter the Communication Server *Port No.*
3. Enter the *Plant Code*.

The screenshot shows the BCIL Application Server Configuration screen with the following values entered: 'Server Ip:' is '192.168.141.226', 'Port No:' is '9100', and 'Plant Code:' is 'C001'. The 'SAVE' button is highlighted with a red border.

4. Click on **Save** button to save the configuration settings.

5. A success message will appear on screen if the details are saved successfully:

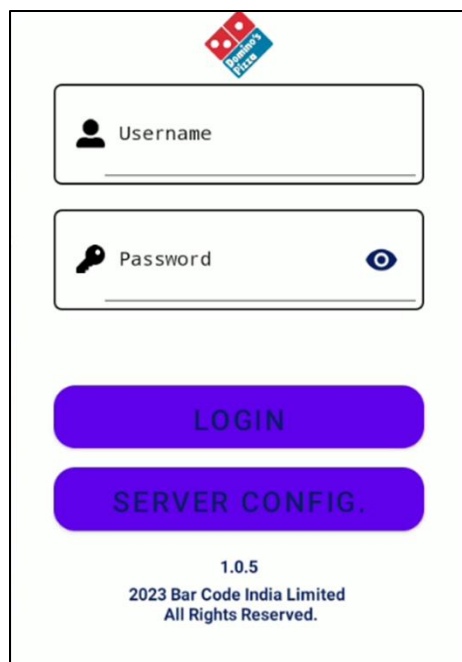

Back

1. Click on **Back** to go back to the Login Screen.

4.1.3 LOGIN PAGE

Once configuration is successfully done, login to the application. This screen is used to login to the device application using authorized credentials.

The screenshot shows a login interface with a white background. At the top center is a logo consisting of three red diamonds with white dots, arranged in a triangular pattern, with the text 'Barcode India' below it. Below the logo are two input fields. The first field is labeled 'Username' with a person icon on the left and a horizontal line for text entry. The second field is labeled 'Password' with a key icon on the left and an eye icon on the right for toggling visibility. Below these fields are two blue buttons with white text: 'LOGIN' and 'SERVER CONFIG.'. At the bottom, the version '1.0.5' is displayed, followed by the text '2023 Bar Code India Limited' and 'All Rights Reserved.'.

1. Enter the *User Id* and *Password* in respective textfields.
2. Click on **Login** button, the system will authenticate the entered User Id and Password.

**In case, wrong Username or Password is entered, an alert message will get displayed.*

4.1.4 DASHBOARD

The following dashboard will be displayed after successful login by user.

Main Menu:-

1. Putaway
2. Internal Movement
3. Picking
4. TO Post
5. Stock Take
6. Exit

4.2 APPLICATION MENU

4.2.1 PUTAWAY

This screen will help user to scan and Put Away the material against Transfer Order Number. The TO details fetched from SAP. To view this screen, click on **Put Away** from device main menu, following screen will be displayed:

PUT AWAY Details

TO No.
